

Pollen Drier and Honey Heater 2 in1

The device is provided with a LED lamp and a double-glazed heat-insulated door, so you can check the process of drying without opening the door (heat loss). The walls insulated with polyester are covered with Glasbord on the external surface. Glasbord is a hard material, resistant to humidity and easy to clean. It is not susceptible to mould, rust or corrosion. Its use is recommended at any place where hygiene and the ability to clean thoroughly are fundamental requirements, e.g. in food processing. The interior of the machine is made of aluminium sheet. The air inlets are made of stainless steel, and the air current is adjustable.

Pollen Drying:

Adjust the temperature to 40 °C for pollen drying.

Screw the ventilation buttons outwards to achieve a gap of ca. 1 cm.

(The white ventilation buttons located on the side and upper part of the machine twist clockwise when screwing outwards)

The pollen drying period is ca. 12-24 hours.

Honey Heating:

Adjust the temperature to 50 °C for honey heating.

Screw in the ventilation bottoms.

(The white ventilation buttons located on the side and upper part of the machine twist anticlockwise when screwing inwards)

The honey heating period is ca. 12-24 hours.

1. Pollen Drier and Honey Heater with 5 Drawers. Electronic display, guided air, 230V-372W. Capacity: 7.5kg pollen, one honey can (45kg), 50 pieces of 1kg honey jars. Dimensions: 50cm×50cm×50cm

2. Pollen Drier and Honey Heater with 10 Drawers. Electronic display, guided air, 230V-372W. Capacity: 15kg pollen, one honey can (45kg), 50 pieces of 1kg honey jars. Dimensions: 50cm×50cm×50cm

3. Pollen Drier and Honey Heater with 14 Drawers. Electronic display, guided air, 230V-394W. Capacity: 21kg pollen, one honey can (45kg), 75 pieces of 1kg honey jars. Dimensions: 50cm×50cm×70cm

4. Pollen Drier and Honey Heater with 20 Drawers. Electronic display, guided air, 230V-566W. Capacity: 30kg pollen, two honey cans (2x45kg), 100 pieces of 1kg honey jars. Dimensions: 50cm×50cm×90cm

5. Pollen Drier and Honey Heater with 30 Drawers. Electronic display, guided air, 230V-588W. Capacity: 45kg pollen, three honey cans (3x45kg), 150 pieces of 1 kg honey jars. Dimensions: 50cm×50cm×150cm
